

# EMERGENCY FIRE EVACUATION PLAN

Adoptive Applicants \_\_\_\_\_

Address: \_\_\_\_\_  
\_\_\_\_\_

Fire Department: Call 911

My/Our house has \_\_\_\_\_ floors.

Basement: There are \_\_\_\_\_ bedrooms on the basement level. We will use the nearest window or basement steps to the first floor in case of emergency/fire.

First Floor: There are \_\_\_\_\_ bedrooms on this floor. Each bedroom has two exits – a door and a window. In case of fire, if safe to exit, we will use the bedroom door and leave through the front door. If unsafe or blocked by fire, we will exit by the nearest bedroom window.

Second Floor: There are \_\_\_\_\_ bedrooms on this floor. Each bedroom has two exits – a door and a window. In case of fire, if safe to exit, we will use the bedroom door and stairs that lead to the front door. If unsafe or blocked by fire, we will exit by the nearest bedroom window using the portable ladder connected to the window (suggested).

Third Floor: There are \_\_\_\_\_ bedrooms on this floor. Each bedroom has two exits – a door and a window. In case of fire, if safe to exit, we will use the bedroom door and stairs that lead to the front door. If unsafe or blocked by fire, we will exit by the nearest bedroom using the portable ladder connected to the window (suggested).

All the above mentioned exits are kept freely accessible at all times.

If evacuation of the house is needed, all members agree to meet at: \_\_\_\_\_

All of the children in our home will be taught the proper way to exit from our home, and we agree to hold drills to be certain that our escape methods work for all members of the household.

We currently have functional smoke detectors (which are checked monthly) on each floor. We currently have a functional fire extinguisher in the kitchen.

This plan shall be reviewed at the time of reevaluation.
